## EUROBENT IN A GLANCE

Eurobent Sp. z o.o. (hereinafter referred to as: „Eurobent” or „the Company”) was founded in 2008.

Eurobent is one of the leading producers of Geosynthetic Clay Liners (hereinafter referred to as: „GCL”) in the world.

Eurobent has two production plants, in Poland and in Greece.

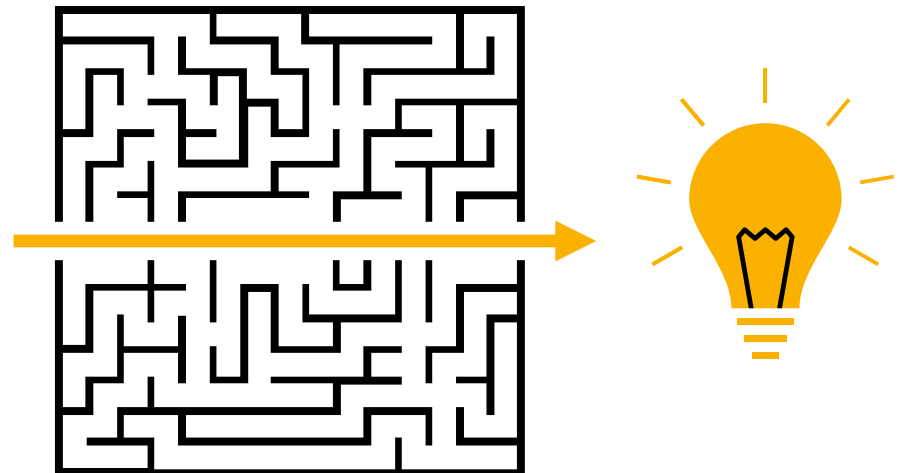

When performing daily work for customers, the company ensures it in accordance with national and international standards. Eurobent's work and services are under constant control of internal inspections (4 internal audits per year) and external independent foreign auditors (2 times per year).

Our skilled laboratory technicians constantly undertake numerous tests on our products to ensure that their high standards are constantly maintained.

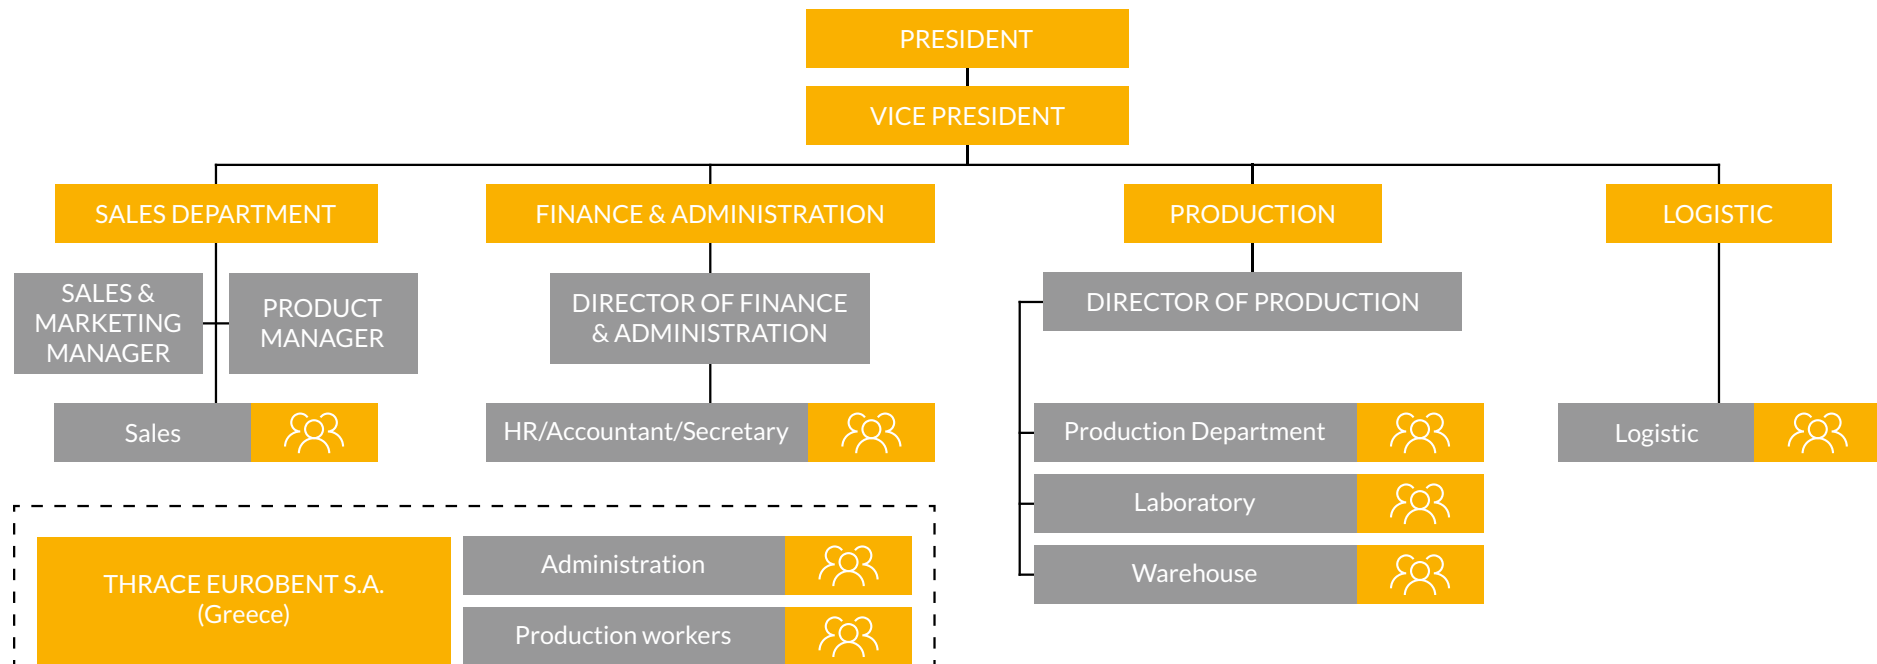

We are committed to constantly reviewing the service we provide, thus ensuring that we not only meet all of our customers' needs and requirements but exceed them.

The company aims to provide the highest quality product that can be produced in the field of Geosynthetic Clay Liners in Europe and also ensure that it would be manufactured, stored and transported in the way to minimize their impact on the environment.

The customers can be sure that they purchase an environmentally friendly product from a company that is dedicated and committed to environmental protection.

## 02. GROUP STRUCTURE

There are two production plants within the group: Eurobent Sp. z.o.o. in Poland and Thrace Eurobent S.A. in Greece.

The Greek plant is a Joint Venture of Thrace Plastics (a global leader in synthetics production) and Eurobent Sp. z.o.o.

Eurobent and Thrace Eurobent have their regional agents who serve designated markets (for example, Spanish-speaking agents serve the Iberian Peninsula and Latin America).

## EUROBENT IN NUMBERS

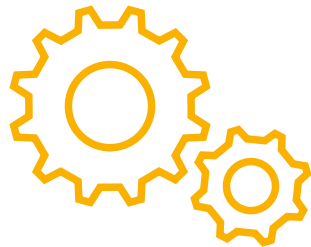

45 people  
work in our team

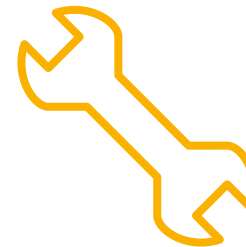

approx. 18 000 000 mln €  
annual turnover for both factories

we have delivered our products to almost  
**50 countries**

8 - 10 000 000 m<sup>2</sup>  
annual production capacity

5 - 6 000 000 m<sup>2</sup>  
current annual production capacity

---

## 04. OUR VALUES

For over a decade of activity we have been accompanied by the motto: Innovation and constant improvement to protect the natural environment and to provide full satisfaction to all of our Customers. It's still up to date! The overriding goal that guides our business is to obtain the reputability of a competent, trustworthy company that responds quickly to the needs and requirements of all customers.

After so many years in the geosynthetics industry, we continue to offer the best to our customers. To fulfill our role and maintain the trust our clients have placed in us, we are committed to both: excellent product quality and excellent customer relations.

With the experience we have gained over the years, we believe we can work towards the best possible results by upholding the values we believe in.

”

*Our goal is continuous development and improvement in the interests of the natural environment and full satisfaction of our customers!*

## MILESTONES

2008

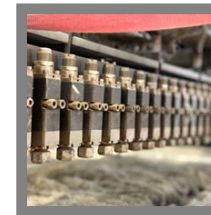

The Company establishment

2014 - 2015

A new production line

The line is used for the GCL production in our plant in Greece

2019

A new head in the gluing machine

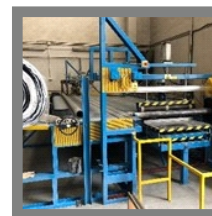

A new, twice as wide as the previous one, glue spreading head was purchased. Thanks to that improvement it was possible to double the speed of gluing line.

Joint venture with Thrace

Increased the production capacity from 4 to 8 million m<sup>2</sup>

2014

A new automated cutting machine

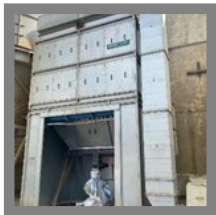

Allows to cut big panels into small rolls with supervision of only one person.

2018

# 06.

## MILESTONES

2019

### A dust collector

One of the most important investment was a professional dust collector with a system which sucks dust particles from the air.

2019 - 2020

### Overhead crane for transporting and unloading of big bags

It allowed for the staff reduction required for the bag unloading from 2 to 1 person.

2020

### Additional warehouse

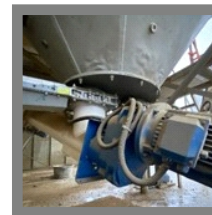

Selected raw materials and finished products are stored without exposure to weather conditions.

### Development of a big bags unloading station

The bigger container capacity allowed for faster, more efficient big bag unloading.

2019

### Bulk material transport system

It allowed to transport heavy bulk materials much faster, preventing breaks of the production process between batches. Modern system elements and technological solutions have eliminated failures.

2020

---

## 07. OUR QUALITY OUR PRIDE

Eurobent has an in-house laboratory where qualified staff ensures product quality from the reception of raw materials through the production process, to testing on finished products.

Cooperation with external certified laboratories allows continuous control of our products and their level of testing in our plant.

ISO, CE and other certificates, which we renew through periodic audits, attest to the highest level of our production process and quality control.
